Institute located in Arlington Cottage, Hotel Street, Honolulu.

All communications or interviews strictly confidential.

For further particulars, address,

Secretary Hagey Institute,
Honolulu.

The Sunlight is

Glistening on

Those "Orange Rims,"

but unfortunately for us it is not glistening on them in this country, as our shipment of STEARNS wheels was put on the "W. H. Dimond," so is not due here for a week. Our COLUMBIAS also are still out of wheeling range, as they got to S. F. the day before the steamer sailed, and no more freight would be received, but they will come along soon, and in the meantime we want you to know that we received 97 RAMBLERS by yesterday's steamer, and can fit you out with either a '96 or '97 wheel, and we know we can suit you. The 1896 RAMBLER is the bargain of the year and the chance to buy a well known high grade wheel for \$75 and \$80 will not last long, as we are informed by the makers that this is the last lot of '96 wheels they can furnish, for, as they write, "our sales have been phenomenal, and you took the last '96 wheels we had in stock."

WE RENT BICYCLES by the hour, day, week or month, and we rent high grade new wheels, such as RAMBLERS, STEARNS, and COLUMBIAS, so if you want a short ride or a long ride, want to ride single or want to ride double, drop in and see how nicely we can fit you out. You will get just as good a mount if you telephone us, and we will send your wheel to your door. Your chance to buy a '96 RAMBLER cheap will only last a few days, don't miss it.

Queen Street, Honolulu.

ABOUT CARVING.

How to Do It Well—By an Expert in the Art.

First, as to the position of the carver, he should not stand, but should have his chair high enough so that he can work comfortably seated.

The platter, which must be sufficiently capacious to hold the entire joint, or bird, when carved, should be placed near enough to prevent a moving of the dish or an awkwardness in his movements. And of all things no string or skewer should be left in the meat when it is brought to the table. Neglect of this particular may cause no end of annoyance.

Large birds, such as geese and turkeys, should have their heads placed always to the left. Smaller birds, like partridges and grouse, which are usually placed across the platter, should have their heads on the farther side. A saddle of mutton should be placed with the tail end to the left of the carver; a haunch of venison or mutton with the loin or backbone nearest the carver; a leg of mutton or veal with the thickest part toward the back of the platter; a shoulder of mutton or veal with the thickest part up, and a rib roast or a sirloin roast with the backbone at the right. In a sirloin beefsteak, the tenderloin should be next the carver. A fillet of beef should have the thickest end at the right, but a calf's head must be placed with the face to the right. A roast pig's head should be placed to the left and the thickest side of a roast ham on the farther side of the platter.

Now, as to the actual carving. Suppose it is a leg of mutton or lamb. Put the fork in the top, turn it toward you and cut slices through to the bone; slip the knife under and cut them away. The best way to learn to carve a fowl is to study it in an uncooked state. When one finds a joint and cuts the grille, the leg or wing is free. In carving roast chicken the leg and wing are first removed from one side and then from the other. Next the breast is carved on each side, and then the wishbone comes off. Separate the collar bones and shoulder blades, the breastbone from the back, then the back from the body, and then the side bones.

How to Dye Straw Black.

Take about half a pound of logwood chips for each hat, and to every half pound add 4 quarts of soft water, or as much as will cover the hats. Boil the hats in this for half an hour without bruising the straw. Then remove them; add more water and a bit of copperas about the size of a bean for each hat. When quite dissolved, return the hats and simmer for 20 minutes. Lift while simmering, to get the air, then remove entirely. Rinse well in plenty of cold water and hang out in the shade to dry. When ready, stiffen the hats by brushing over with light glue, and when dry block as usual.

To Clean a Barrel.

To remove an odor from a barrel half fill it with cold water. Heat half a dozen stones the size of the palm of the hand until they are redhot and throw them into the water and let the water remain in the barrel until cold. Then rinse the barrel with clean cold water.

For Music Pupils.

Excerpts from sonatas, concertos, etc., comprising single movements can be used to great advantage as studies.

By practicing sight reading an hour each day you can easily acquire facility. Don't guess regarding a note, but think it out and know all about it.

Read somewhat in advance of your playing for correct time, fingering and notes.

Read by pulses (counts), groups and motives, rather than by single notes.

The gyrostile is a small device or machine to develop the hands of musicians by scientific method. It can be carried to the hand of the student or in the pocket. List of exercises goes with each machine.

It is quite possible for persons without previous musical knowledge to acquire much for vocal use, from the rudiments to phrasing and expression, by means of singing societies under able leadership.—Etude.

A VOICE FROM THE BLEACHERS.

Local interest in the cricket games as reflected from the "bleachers" is increasing. During Saturday's games the "bleachers" were particularly vociferous and kept the players under a running fire of good natured banter. One small boy brought down the crowd by advising the batsman to "go buy a case of Rainier Beer and get some life in you." The crowd applauded the remark, knowing that Rainier Beer is celebrated for its invigorating and strength-giving propensities. On tap or in bottles at the Criterion.

Superior breakfast sausage is a specialty at the Central Market. Ring up 104.

New suitings and pants patterns are arriving by every mail steamer for L. B. Kerr. He sells a single yard at wholesale prices.

King Bros. have just received a few lot of tissue paper, window noles, sash rods, artists' materials, picture frames, etc.
